PROFILE

Motivated and security-conscious Cybersecurity Analyst and Informatics undergraduate with a growing foundation in software development and hands-on experience working with Linux-based systems, networking protocols, and secure computing environments. Skilled in using tools like Wireshark, Nmap, and Parrot OS, with working knowledge of Python, HTML, CSS, and modern web development concepts. Actively building responsive, user-focused websites and exploring backend technologies such as Node.js and MongoDB. Passionate about network security, problem-solving, and contributing to open-source projects, while continuously enhancing both technical and analytical skills in cybersecurity, programming, and data science.

WORK EXPERIENCE

- GitHub**2022- PRESENT
- Open Source contributor
- Designed and developed responsive, mobile-first websites optimized for performance, accessibility, and seamless user experience across desktop, tablet, and mobile devices.
 - Enhanced UI/UX by implementing fast load times, intuitive navigation, and user-centered design principles.
 - Collaborated with international development teams and open-source communities, aligning contributions with project goals and user needs.
 - Delivered high-quality websites tailored to client or project-specific requirements through direct communication and agile iteration.
 - Actively participated in Hacktoberfest annually, contributing code, fixing bugs, improving documentation, and adding new features to open repositories.
 - Strengthened collaboration skills through pull request management, issue tracking, code reviews, and technical discussions within distributed teams.

EDUCATION

- Bachelors Degree, Informatics**2022- 2026
- School of Information Sciences| Moi University
